1a Info:

Specific Notes:

- System will be comprised of 12" lines on playing surface, spaced 15 ft. (fitting-to-fitting).
 - The 12" Multi-Flow will join together, along with the sideline transport pipe, at the same location within the same trench (see 1a). Standard corrugated round pipe (4") may be custom fit on-site, to easily allow for variations in depth.
 - The Multi-Flow will join together, using the appropriate coupler. At each of the coupled locations, it is suggested that a 2" PVC tape be used to secure the geotextile, to the connection.
